

Mission:

To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

Ron DeSantis
Governor

Scott A. Rivkees, MD
State Surgeon General

Vision: To be the Healthiest State in the Nation

10/23/2020 Local COVID19 Update

Snapshot: 10/09/20 - 10/22/20
(updated every other Friday)

Positivity during this timeframe:
12%**

Positive tests this timeframe: 79

Total tests this timeframe: 637

Deaths during this snapshot: 0

*Positivity = the number of people who test positive in a week divided by all the people tested that week. Excludes people who have previously tested positive and all positive and negative inmate tests.

State Positivity: 4%
(as of 10/23/20)

Median Age in Franklin: 39

Totals Since the Beginning:

Unduplicated positive tests (rapid antigen and PCR): 742

Positive inmates: 322

Positive long term care (staff and residents): 4

Overall hospitalizations: 9

Deaths: 4

Total Tests: 5,423

Negative tests: 4,668

Here are the Franklin County testing numbers as of 2:00pm today: (see above)

- Updated County Health Department Message (A Message From Your CHD, page 2)

A MESSAGE FROM YOUR COUNTY HEALTH DEPARTMENT

Long Term Care Facility Visitation Update.

On yesterday, Gov. Ron DeSantis lifted visitation restrictions at long-term care facilities. This action will:

1. Remove the current prohibition on children visitation.
2. Ease restrictions on outdoor visitation.
3. Clarify that there are no social distancing requirements for compassionate caregivers.
4. Eliminate the 5-person maximum number of general visitors.

The Governor is hopeful, that lifting the previously set restrictions will provide residents in long-term care facilities with greater opportunities to safely visit with their loved ones.

Get your Flu Shot! And remember to Vaccinate before Halloween. The Centers for Disease Control and Prevention (CDC) recommends everyone six months and older get a flu vaccine every year. This year, the CDC underscores that flu vaccine is more important than ever to protect yourself and the people around you, and to help reduce the strain on health care systems responding to Covid-19. For more information, go to <http://www.floridahealth.gov/newsroom/2020/09/090920-flu-prevention.article.html>

QUARANTINE/ISOLATION FACTS

The quarantine period is important. We need close contacts to a positive case to quarantine for 14 days from the date of their exposure to the positive individual. Getting a test that is negative during the quarantine period does not stop the clock. We have seen many individuals develop infection on the second week of quarantine, so it is really important to stay quarantined for the full 14-day period. Household quarantine can be a little more stretched since it can be very difficult for a positive individual to properly isolate from everyone else. If you live in the same household as a positive case unable to properly isolate, you need to quarantine while the person is sick and once this individual is no longer infectious, that's when your quarantine 14 period will start.

I tested positive for COVID19. When can I be around others (no longer infectious)? If you tested positive for COVID19, you need to stay at home and isolate per the guidance provided by public health officials. If you think or know you had COVID-19, and had symptoms, you can be with others after at least 10 days since symptoms first appeared AND at least 24 hours has passed with no fever without fever-reducing medication AND symptoms have improved. If you tested positive for COVID-19 but had no symptoms, you can be with others after 10 days have passed since your test. If you develop symptoms after testing positive, follow the guidance above that includes fever and symptoms improving. Follow this link to stay tuned on updates: <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/end-home-isolation.html>

Some Masks Protect Better than Others

There was a recent study published by Duke University about mask effectiveness. Some masks work better than others. The usage of more effective masks can make a difference in reducing the transmission of this virus. This study looks at respiratory droplets that people are exposed to or that they expel into the air.

This study has been highlighted on nightly news outlets, like this one: <https://www.cnbc.com/2020/08/11/study-bandanas-and-neck-gaiters-not-effective-as-surgical-face-masks.html>

A copy of the full study can be found using this link:

<https://advances.sciencemag.org/content/early/2020/08/07/sciadv.abd3083>

CLOTH FACE COVERS/MASK

Why wear the mask in public?

Answer: My cloth face covering protects you. Your cloth face covering protects me. Although not a 100% guarantee, the use of masks has been proven using actual case investigations to dramatically reduce the spread of the virus. People who are infected can spread the virus before they develop symptoms or in the absence of symptoms. Wearing a cloth face covering may help prevent the spread of the virus by people who are infected and do not know it. Use of cloth face coverings continues to be a recommendation long-term prevention measures such as vaccines are being developed.

Cloth face coverings do not replace other protective measures. CDC still recommends that you stay at least 6 feet away from other people (social distancing), wash your hands frequently, and avoid touching your eyes, nose, and mouth....and your face covering. Cloth face coverings should not be placed on children under age 2.

If you or someone you love needs a cloth mask, please call 850-340-3016.

The CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain, especially in areas of significant community-based transmission.

For information on how you can make a facemask at home, visit <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover.html> and watch this video <https://youtu.be/tPx1yqvJgf4>.

TESTING

If you suspect you might have COVID-19, please do not travel here. Please get a COVID-19 test (nasal swab for active infection) in your community and know your results before you arrive. Stay home when you are sick and follow CDC guidelines. Visitors are also responsible for helping to keep our communities safe and healthy. Call your health care provider first or if you are symptomatic to determine the need for testing. If a person thinks they have COVID-19, they should call their health care provider before going to their office so the provider can take precautions to prevent exposing other people. In some cases, they are going to meet you in the parking lot. It's just a precaution. We are really trying to keep our healthcare workers safe. Other patients safe. Review your signs, symptoms and travel history with your physician. Your provider is going to evaluate you for possible causes

COUNTY HEALTH DEPARTMENT EXPANDED TESTING PLAN

The Florida Department of Health offers FREE COVID-19 testing. Please call (850) 653-2111 to make an appointment.

WEEMS OFFERS TESTING

Weems Medical Centers offers active COVID-19 and COVID-19 antibody testing. Free for uninsured patients and zero copay for patients with coverage. An **official provider order** is required for all non-Weems clients. To make an appointment for testing, individuals should call the East Clinic at (850) 697-2345 or West Clinic at (850) 653-1525.

ANTIBODY TESTING

To learn about antibody testing, see http://ww11.doh.state.fl.us/comm/_partners/action/antibody_testing.pdf or see visit <https://www.cdc.gov/coronavirus/2019-ncov/testing/serology-overview.html> for CDC information about antibody testing.

COVID-19 REINFECTION

Available information from the CDC shows immunity for 90 days. There are no confirmed reports to date of a person being reinfected with COVID-19 within 3 months of initial infection.

A person who has had and recovered from COVID-19 may have low levels of virus in their bodies for up to 3 months after diagnosis. This means that if the person who has recovered from COVID-19 is retested within 3 months of initial infection, they may continue to have a positive test result, even though they are not spreading COVID-19. Meaning, they are no longer infectious to others. However, additional research is ongoing.

Therefore, if a person who has recovered from COVID-19 has new symptoms of COVID-19, the person may need an evaluation for reinfection, especially if the person has had close contact with someone infected with COVID-19. The person should isolate and contact a healthcare provider to be evaluated for other causes of their symptoms, and possibly retested.

More information can be found here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/duration-isolation.html?CDC_AA_refVal=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fcommunity%2Fstrategy-discontinue-isolation.html

MENTAL HEALTH

COVID-19 have you feeling...STRESSED/ANXIOUS/DEPRESSED/UNSURE? NEED SUPPORT? CALL 850-270-8911, available 9-5pm EST. If you are in need of immediate mental health services call one of the agencies below available 24/7:

- National Suicide Prevention Hotline: 1-800-273-TALK (8255)
- SAMSA Disaster Helpline: 1-800-985-5990 or text TalkWithUs to 66746 or the Crisis Text Line: Text "HOME" to 741-741
- Florida Blue, in partnership with New Directions Behavioral Health, is providing a free emotional support resource for all Floridians even if not covered by Florida Blue insurance. Any Floridian – even if uninsured or insured by another plan – can call 833-848-1762 for support in managing feelings of stress, anxiety, grief or fear related to the COVID-19 pandemic.

WORKPLACE RESOURCES

We get asked a lot about daily health screenings for employers. The CDC has updated strategies and recommendations for employers responding to COVID-19, including those seeking to resume normal or phased business operations. Recommendations to [Prepare Your Small Business and Employees for the Effects of COVID-19](#) The questions were modified for the adult workforce. In addition to regular temperature checks, the follow questions can be asked to employees:

Daily Health Questionnaire

1. Do you or anyone in your household have any of the following symptoms? (fever 100.4 or above, cough, shortness of breath or difficulty breathing, chills, muscle pain, sore throat, congestion, runny nose, nausea, vomiting, new loss of taste or smell)
2. Have you or anyone in the household traveled outside of the country or to any highly affected areas in the United States in the past 14 days?
3. Have you had direct contact (within 6 feet for more than 15 minutes) with anyone who has tested positive with COVID-19 within the last 2 weeks?
4. Is there anyone in your household under instructions to self-isolate or quarantine due to COVID-19?

RURAL DEVELOPMENT

There are several resources available for rural residents and business coping with the impact of COVID-19. Please visit the Rural Development Coronavirus Response page: <https://www.rd.usda.gov/coronavirus>

SUPPORTING CHILDREN THROUGH THE COVID-19 PANDEMIC

COVID-19 has upended children's daily lives, resulting in added stress and uncertainty. Studies show that adversity during childhood, including adversity stemming from natural disasters, can have lasting impacts on children's social emotional health. Fortunately, families can take steps to support and protect children's emotional well-being during the COVID-19 crisis. For more information visit the Nat'l Institute for Children's Health Quality site at <https://bit.ly/2JFXCM6>.

The Germ that Wears a Crown: A Story About the Coronavirus: This is a story, coloring & activity book from FSU Center for Child Stress & Health to help children cope with COVID-19. The book teaches children about the virus, social distancing and how to express and manage strong emotions. Visit <http://fsustress.org/ebook.html> to download a free copy!
