### A MESSAGE FROM YOUR COUNTY HEALTH DEPARTMENT

We are closely monitoring the COVID-19 positivity percentage in Gulf and Franklin. For small counties, it is better to look at weekly trends vs. daily trends to paint a better picture of what is happening. The percent is based on the number of people who test positive in a week divided by all the people tested that week, excluding people who have previously tested positive.

Let's look at the past two weeks using surveillance data from Floridahealth.gov. We really want to keep the positivity percentage as low as possible. 20.6% is too high. Gulf needs to aim for 10% and then keep moving downward. We are hoping to get both counties below 5%. Gulf and Franklin cases are linked to whole household exposures, some businesses, funeral-related gatherings, and some have been healthcare worker related.

Total Positive: 43

Positivity: 7.3%

Week 2 – July 17-23

Total number of COVID19 tests (nasal swab to test for active infection): 548

Total Positive: 113

Positivity: 20.6%

**TESTING**

If you suspect you might have COVID-19, please do not travel here. Please get a COVID-19 test (nasal swab for active infection) in your community and know your results before you arrive. Stay home when you are sick and follow CDC guidelines. Visitors are also responsible for helping to keep our communities safe and healthy.

Call your health care provider first or if you are symptomatic to determine the need for testing. If a person thinks they have COVID-19, they should call their health care provider before going to their office so the provider can take precautions to prevent exposing other people. In some cases, they are going to meet you in the parking lot. It's just a precaution. We are really trying to keep our healthcare workers safe. Other patients safe. Review your signs, symptoms and travel history with your physician. Your provider is going to evaluate you for possible causes and rule out other respiratory illnesses (ex. Flu) before testing for COVID-19.

**COUNTY HEALTH DEPARTMENT EXPANDED TESTING PLAN**

The DOH-Franklin offers FREE COVID-19 testing every Monday – Friday from 8:30am – 11:00am & 1:00pm – 4:00pm. Testing is conducted at health department located at 139 12<sup>th</sup> Street, Apalachicola, FL. Symptoms are NOT required for testing. Please call (850) 653-2111 to make an appointment.

FREE COVID-19 drive-thru testing on Monday, July 27, 2020 at the Honeyville Community Center located at 240 Honeyville Park Rd, Wewahitchka, FL from 9a – 3p. Please stay in your car. No appointment necessary.

**WEEMS OFFERS TESTING**

Weems Medical Centers is conducting free COVID-19 testing for uninsured patients and insurance billed testing with zero copay for patients with coverage. An official provider order is required for testing.

Weems is also providing FREE COVID-19 antibody testing at both their East (Carrabelle) and West (Apalachicola) clinics. To make an appointment for testing, individuals should call the East Clinic at (850) 697-2345 or West Clinic at (850) 653-1525.

**ANTIBODY TESTING**

To learn about antibody testing, see [http://ww11.doh.state.fl.us/comm/\\_partners/action/antibody\\_testing.pdf](http://ww11.doh.state.fl.us/comm/_partners/action/antibody_testing.pdf) or see visit <https://www.cdc.gov/coronavirus/2019-ncov/testing/serology-overview.html> for CDC information about antibody testing.

## **QUARANTINE/ISOLATION FAQs**

**A great resource to answer many frequently asked questions can be found on the CDC website:**

<https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

**The quarantine period is important.** We need close contacts to a positive case to quarantine for 14 days from the date of their exposure to the positive individual. Getting a test that is negative during the quarantine period does not stop the clock. We have seen many individuals develop infection on the second week of quarantine, so it is really important to stay quarantined for the full 14-day period. Household quarantine can be a little more stretched since it can be very difficult for a positive individual to properly isolate from everyone else. If you live in the same household as a positive case, you need to quarantine while the person is sick and once this individual is no longer infectious, that's when your quarantine 14 period will start. We explain all of this to every close contact identified and can provide quarantine orders to each individual.

**I tested positive for COVID-19. When can I be around others (no longer infectious)?** If you tested positive for COVID-19, you need to stay at home and isolate per the guidance provided by public health officials. If you think or know you had COVID-19, and had symptoms, you can be with others after at least 10 days since symptoms first appeared and at least 24 hours has passed with no fever without fever-reducing medication and symptoms have improved. If you tested positive for COVID-19 but had no symptoms, you can be with others after 10 days have passed since your test. If you develop symptoms after testing positive, follow the guidance above that includes fever and symptoms improving. Follow this link to stay tuned on updates:

<https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/end-home-isolation.html>

Depending on your healthcare provider's advice and availability of testing, you might get tested to see if you still have COVID-19. (Ex. residents of a nursing home.) If you are tested, you can be around others when you have no fever, respiratory symptoms have improved, and you receive two negative test results in a row, at least 24 hours apart.

## **CLOTH FACE COVERS/MASK**

### **Why wear the mask in public?**

My cloth face coverings protect you. Your cloth face covering protects me. Although not a 100% guarantee, the use of masks have been proven to dramatically reduce the spread of the virus.

People who are infected can spread the virus before they develop symptoms or in the absence of symptoms. Wearing a cloth face covering may help prevent the spread of the virus by people who are infected and do not know it. Use of cloth face coverings continues to be a recommendation (<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/diy-cloth-face-coverings.html>) while long-term prevention measures such as vaccines are being developed.

The CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), especially in areas of community spread. Cloth face coverings do not replace other protective measures. CDC still recommends that you stay at least 6 feet away from other people (social distancing), wash your hands frequently, and avoid touching your eyes, nose, mouth.....and your face covering. Cloth face coverings should not be placed on children under age 2.

**If you or someone you love needs a cloth mask, please call (850) 340-3016.**

The CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies) especially in areas of significant community-based transmission. It is important to note that these face coverings:

1. Are not surgical or N-95 respirators, which continue to be reserved for healthcare workers and medical first responders, and
2. The use of cloth face coverings does not mean we can remove previously set social distancing measures.

For information on how you can make a facemask at home, visit <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover.html> and watch this video <https://youtu.be/tPx1yqvJgf4>.

The Franklin County Emergency Management is collecting fabric for mask. If you would like to help our community by sewing face mask or donating fabric, please call the Franklin County Emergency Management office at (850) 653-4206.

**WORKPLACE RESOURCES**

We get asked a lot about daily health screenings for employers. The CDC has updated strategies and recommendations for employers responding to COVID-19, including those seeking to resume normal or phased business operations. Recommendations to [Prepare Your Small Business and Employees for the Effects of COVID-19](#) The questions were modified for the adult workforce. In addition to regular temperature checks, the follow questions can be asked to employees:

**Daily Health Questionnaire**

1. Do you or anyone in your household have any of the following symptoms? (fever 100.4 or above, cough, shortness of breath or difficulty breathing, chills, muscle pain, sore throat, congestion, runny nose, nausea, vomiting, new loss of taste or smell)
2. Have you or anyone in the household traveled outside of the country or to any highly affected areas in the United States in the past 14 days?
3. Have you had direct contact (within 6 feet for more than 15 minutes) with anyone who has tested positive with COVID-19 within the last 2 weeks?
4. Is there anyone in your household under instructions to self-isolate or quarantine due to COVID-19?
