

Mission:

To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

Ron DeSantis
Governor

Joseph A. Ladapo, MD, PhD
State Surgeon General

Vision: To be the Healthiest State in the Nation

Franklin and Gulf Community Health Update – 1/21/2022

1. **VACCINES:** COVID-19 vaccines are still available at your local health department, medical provider offices, and some pharmacies.

For the latest information about boosters, see below on page 3.

2. **TESTING:** Every home in the U.S. is eligible to order 4 free at-home COVID-19 tests. Orders will usually ship in 7-12 days. To order your tests, visit <https://www.covidtests.gov/> so you have them when you need them.

If you need a COVID-19 test now, COVID-19 testing remains available and health providers appreciate your patience as they assist with the increased demand in our communities. If you do not have symptoms, COVID-19 testing is unlikely to have any clinical benefits. If you are planning to use a drive-up Nomi Health Testing site, they would like you to please **pre-register** for your appt to improve your wait time. You can do this by going to the Nomi Health website:

<http://testing.nomihealth.com/signup/fl>

A full list of local places for testing is available below on page 4.

3. **MEDICAL TREATMENT:** Talk to your medical provider about treatment options available. Depending on your medical history, risks, and symptoms, your health care provider can help you determine whether a therapy that is FDA-approved, or available under an EUA, is right for you. For more information about accessing state treatment resources, visit <https://floridahealthcovid19.gov/>.

If you are positive and do not need medical attention:

- You can end isolation after 5 full days if you are fever-free for 24 hours without the use of fever-reducing medication and your other symptoms have improved.
- You should continue to wear a [well-fitting mask](#) around others at home and in public for 5 additional days (day 6 through day 10) after the end of your 5-day isolation period. If you are unable to wear a mask when around others, you should continue to isolate for a full 10 days. Avoid people who are [immunocompromised or at high risk for severe disease](#), and nursing homes and other high-risk settings, until after at least 10 days.

Hospitals across the state are reporting increased ER visits by patients seeking COVID-19 tests. While facing the strain of workforce challenges, ERs are being put under increased pressure to provide care. Help your local hospital by the COVID-19 Zone Tool to determine the most appropriate course of action based on your symptoms. Find the tool displayed below on page 5.

4. **The health department is no longer calling to investigate every positive case in Franklin and Gulf Counties.** This change is designed to improve our ability to respond to and provide public health interventions to high-risk congregate settings and outbreaks (ex. Nursing homes, jails, etc.) **Please continue to follow CDC guidance for information on isolation (positive case) and quarantine (close contact to positive case).**
5. **Information about local data can be found on the CDC link:**
<https://covid.cdc.gov/covid-data-tracker/#datatracker-home>

Who Can Get a COVID 19 Booster Shot? (as of 1/13/22 per CDC website)

Use the COVID-19 Zone Tool to determine the most appropriate course of action based on your symptoms.

Hospitals across the state are reporting increased ER visits by patients seeking COVID-19 tests. While facing the strain of workforce challenges, ERs are being put under increased pressure to provide care. Help your local hospital by following the below COVID-19 Zone Assessment.

Experiencing **Mild or No COVID-19** Symptoms?

GREEN ZONE

- I can breathe easily without shortness of breath.
- I am not experiencing chest tightness.
- My energy level is nearly normal.
- I can think clearly.
- I was exposed to someone who has COVID-19.
- I was sick with COVID-19, now I am better and need a test to return to work/school.
- I need a COVID-19 test to travel.

✓ GREEN ZONE ACTION

- Seek a testing site or at-home test NOT an ER.
 - Find a testing site: <https://t.co/VFg7hQRv5E>
- Manage mild to moderate symptoms at home with over-the-counter medication as directed. If positive, follow CDC guidelines for isolation or quarantine.
- Additional quarantine guidelines: www.cdc.gov/media/releases/2021/s1227-isolation-quarantine-guidance.html

Experiencing **COVID-19** Symptoms?

YELLOW ZONE

- I have a fever.
- I have a new or worsening cough.
- I am having trouble catching my breath.
- My thinking is slow.
- I am experiencing dizziness.

▲ YELLOW ZONE ACTION

- Seek a testing site or at-home test NOT an ER.
 - Find a testing site: <https://t.co/VFg7hQRv5E>
- Call or message your doctor or healthcare provider to be evaluated. Share symptoms and follow your doctor's directions.
- Manage mild to moderate symptoms at home with over-the-counter medication as directed. If positive, follow CDC guidelines for isolation or quarantine.
- Additional quarantine guidelines: www.cdc.gov/media/releases/2021/s1227-isolation-quarantine-guidance.html.
- Find monoclonal antibodies without visiting an ER: www.floridahealthcovid19.gov/treatments/treatmentlocator/.

Experiencing **Severe** COVID-19 Symptoms?

RED ZONE

- My breathing is very fast.
- I can't catch my breath.
- I am having chest pain.
- I can't eat or drink.
- I am confused.
- I can't stay awake.
- I passed out or feel like I am going to pass out.

✗ RED ZONE ACTION

- Call **9-1-1** or call ahead to your local emergency facility.
- Notify the operator that you are seeking care for someone who has or may have COVID-19.
