

OUR GOAL: To help our Franklin County diners make smarter, more informed decisions about their nutritional health and promote caloric transparency and clean healthy eating, the Florida Department of Health – Franklin County is initiating a Healthy Choices Restaurant Program throughout the county, partnering with local restaurants, cafes, and delicatessens.

- The Healthy Choices Restaurant Program welcomes all dining facilities to participate. Restaurant partners will be spotlighted as a Healthy Choice Partner.
- It is recommended that restaurants offer three or more menu items that have less than 400 calories. Our calorie counting software will count the calories free of charge.
- It's easy and it gives your restaurant a competitive edge.
